CIRCULATING BOOKS

Ancient Egypt by Peter Chrisp - 932 CHR

Chrisp, P. (2002). Ancient Egypt. London: Dorling Kindersley. The combination of photos and drawings gives readers the effect of walking through an exhibit. Each spread covers different topics such as life on the Nile, tomb building, mummification, and other elements of Egyptian life. This is a wonderful source to use in the classroom or have students use this as a source to complete a group assignment.

The Egyptology Handbook by Emily Sands - 900 SAN

Sands, E. (2005). The Egyptology handbook: A course in the wonders of Egypt. Cambridge, MA: Candlewick Press. This is a great hands-on book for students to use in the classroom to since it was written by an actual Egyptian historian who vanished on an expedition in 1927. Be careful of letting students use this book on their own since there are stickers that could go missing.

ELECTRONIC RESOURCES

Egypt: Secrets of the Pharaohs by National Geographic VID 932.01 EGY

The National Geographic Society sheds light on the secrets of the pyramids, mummification, and the Egyptian Pharaohs. The video actually takes students down in the tomb of Pharaoh Khufu's tomb. Viewers can learn how the mummification process works by a group of medical archaeologists.
