

METIS 2018

SAVE THE DATE

Mississippi Education & Technology Innovation Symposium
June 27-29, 2018 | Jackson Convention Complex | Jackson, MS

We invite you to join our third annual symposium, hosted by the Mississippi Department of Education (MDE) Office of Technology and Strategic Services (OTSS). The symposium is open to all Mississippi superintendents, administrators, educators, IT staff, business managers, school improvement team members, and anyone interested in improving student achievement and learning the importance of using quality data.

Concurrent sessions will include a broad range of topics relevant to data, policies and standards, instructional technology and cybersecurity. Attendees will learn more about the best practice uses of technology in Mississippi schools, obtain a better understanding of federal and state reporting requirements, and gain insight into reporting changes for Fiscal Year 2019. Attendees will also have personal access to MDE program offices and premium exhibitors.

For more information, email the METIS Team at metis@mdek12.org, or call Debra Hines or Barbara Young at 601-359-3487.
