

ISIP Configuration

Administrators can determine how often students will be assessed

[Click here to copy the URL](#)

ISIP Configuration lets administrators modify assessment visibility by product and/or grade for different locations.

There are a few options to choose from for test-visibility

- Visible: The test will automatically prompt starting the first of each month until the student finishes
- Placement Only: The test will only automatically prompt if the student does not have any scores on file for the current school year.
- Not Visible: The test will never automatically prompt.

There are also specific options for where [On Demand Assessments](#) (ODAs) are allowed.

- Only At School: Students can only take ODAs from an on-campus IP address.
- Only At Home: Students can only take ODAs from an off-campus IP address.
- Allow Anywhere: Students can take ODAs from any IP address.
- Do Not Allow Anywhere: Students cannot take ODAs at all.

Monthly Assessment Options

Permissions by Role

At Campus IP Address (On-Campus)	At Other IP Address (Off-Campus)	Allow On Demand Assessments
Visible*	Visible	Only At School*
Placement Only	Not Visible*	Only At Home
		Allow Anywhere
		Do Not Allow Anywhere

*Default Option

Under On-Demand ISIP Permissions, district administrators can also toggle between Can Assign and Cannot Assign per product for Campus Managers and Teachers. If district administrators have given campus administrators permission to adjust their campus's ISIP Configuration pages, campus administrators can also opt to allow or disallow teachers to assign [On Demand Assessments](#).
