DATA POWERED DECISIONS

Use EDLA data collections to help your district:

- Analyze student device and application usage and the impact on their learning
- Develop strategic plans for technology, digital learning professional development, and coaching support
- Compare results across schools to identify and spread successful technology initiatives
- Determine return on investment for technology purchases
- Support digital learning initiatives with school boards and other key stakeholders

Technology & Learning

Survey focused on the use of technology in traditional and virtual instruction

- No cost to districts (provided through 2024)
- Released for all districts to participate in Spring of 2021
- Collections deployed biannually in the fall and spring
- Link provided to teachers, students, and families
- Surveys are anonymous
- No Data Sharing Agreement required
- MDE does not access PII
- Results compiled in data dashboards
- BrightBytes Client Thought Partners help districts analyze data
