Canva ▶ https://www.canva.com/

Publishing digital graphic designs and concepts has never been easier with simple drag-and-drop features and access to over a million photographs, graphics, and fonts for creating digital ideas. Storing mind maps, schedules, or visual representations has never been simpler or more beautiful than with Canva.

CLASSROOM CONNECTIONS

[4Cs: Collaboration, Communication, Creativity, Critical Thinking]

Teachers can use Canva to track progress monitoring as students work solo or as a team to bring their ideas to life, provide timely feedback to one another, or simply free their minds of all the overwhelming information.

Collaboration Use Canva projects to have students work together to create digital artifacts in real time while collaborating on their own devices.

Creativity Allow students to create digital representations of their thinking as they process new material and reflect on previous skills they have learned.

TRY IT

Create individual student portfolios where work can be housed from student work sessions such as brainstorming activities, graphic organization, problem solving, collages, study guides, presentations, resumes, cover letters, and more.
