# MSIS defines Exit Date as the last day of attendance.
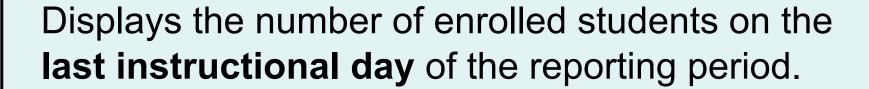

Exit Dates may differ from MSIS and the SIS. The SIS may not allow an attendance code to be recorded on the date the student exits. In this case, the SIS package will send MSIS the previous instructional day's date as the exit date. The SIS may note the exit date as the day after the last day of attendance.

# Net Membership Report

# MSIS and SIS Report calculations may show calculation differences.
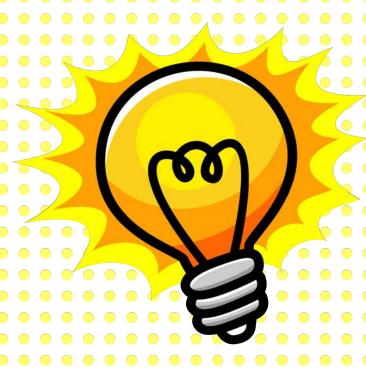

SIS vendors may calculate their Attendance reports using MSIS Legacy logic.

Data is transferred nightly via API from the SIS as a **rolling 45-day attendance record** for each student. This allows any edits made to a student's attendance in the past 45 days to be captured.

**June**: The API will send a student's attendance for the complete school year, allowing for any changes made after the previous 45-day windows to be captured.

**Any changes made to attendance after a certification period has passed will not affect the certified attendance.** However, the student's attendance will be accurately reflected in MSIS.

# If a student's absence changes outside of the 45-day window:

Wait until student's full attendance is sent at the end of the year for the record to be corrected in MSIS.

OR

CA: Request a catch-up file be sent to MSIS from SAM Support

PS: Schedule a full publish of the student's attendance to MSIS

DATA QUALITY DASHBOARD: **ATTENDANCE**

| Business Rule | Error/ Warning | Tab Name | Description | Resolution |
|---|---|---|---|---|
| Enrollment Check | Error | Enrollment | Attendance is being reported for a student that is not enrolled. | Verify the date of attendance falls within the timeframe of the student's enrollment. Verify the student is enrolled in the school for which attendance is being reported in your SIS. |
| School Session Check | Error | School Session | Attendance is being reported for a student on a non-instructional day. | Review the school calendar to ensure the attendance date reported is on a day when students are expected to attend (instructional day or a late arrival/early dismissal day). Update the attendance date in your SIS and/or check the school calendar for accuracy. |
| Suspension Check | Error | Suspension | Incorrect attendance type is being reported for a student during a suspension period. | Student's suspension dates must be marked as unexcused absences. Update the student's attendance as unexcused absence in your SIS and/or check the suspension period for accuracy. |
| Weekend Reporting Check | Warning | Weekend Reporting | Attendance is being reported on a Saturday or Sunday. | Check the school calendar for accuracy of weekend dates. If the weekend day is correctly reported as an instructional day, no further action is needed. |
| Instructional Days Check | Error | Instructional Days | The student's total number of days reported for attendance do not match the total number of instructional days in the same period. | Check for missing or incorrect attendance reporting for this student and/or check calendar for accuracy. |
| Future Date Check | Error | Future Date | Attendance is being reported for a future date. | Update the attendance date to a current or prior date, not a future date, in your SIS. |
| School Year Check | Error | School Year | Attendance is being reported for a prior school year. | Update the attendance date to current school year in your SIS. |
