OFFICE OF DISTRICT AND SCHOOL PERFORMANCE

04. Information: Report on Mississippi Academic Assessment Program (MAAP) achievement gap results by subgroup [Goals 1, 4, and 6 – MBE Strategic Plan]

Background Information: In accordance with Every Student Succeeds Act (ESSA) 20 U.S.C.A § 6311 (h)(1)(c), the Office of District and School Performance has calculated and produced achievement gap data by subgroup using the 2018-2019 Mississippi Academic Assessment Program (MAAP) results. The achievement gap has been calculated using student achievement at proficient and above for both the state and district level and is disaggregated for the following subgroups:

- All Students
- Major Racial & Ethnic groups
- Students with Disabilities
- Limited English Proficient
- Economically disadvantaged
- Gender

Also included in the report is a comparison between the 2017-2018 and 2018-2019 reported achievement gap results by subgroup.

This item references Goals 1, 4, and 6 of the *Mississippi Board of Education 2018-2022 Strategic Plan*.

Achievement Gap Methodology

Achievement gap analysis identifies any disparity in assessment proficiency between subgroups of Mississippi's student population. As part of the Mississippi Consolidated State Plan for the *Every Student Succeeds Act* (ESSA), Mississippi aims to eliminate, or close, the assessment proficiency gap between student subgroups by 2025.

Assessment proficiency is defined as scoring at Level 4 or higher on a 1 – 5 proficiency scale for the yearly subject area assessments, where

- Level 1 is minimal proficiency in subject area
- Level 2 is basic proficiency in subject area
- Level 3 is “passing” proficiency in subject area
- Level 4 is proficiency in subject area
- Level 5 is advanced proficiency in subject area

The current achievement gap analysis is based on the 2018 and 2019 student assessment data for English Language Arts and Mathematics. The gap analysis of the 2018 and 2019 assessment data includes only the assessment information on the *first* attempt of the subject area exam for each student, each year.

To calculate the gap, the percentage of students scoring at Level 4 or higher is calculated at the State and District level for each student subgroup. The categories of student subgroups include:

- Race
 - White (reference)
 - African-American
 - Hispanic
 - Asian
 - Multiracial
 - Native American/Pacific Islander
- Economic Status
 - Not Economically Disadvantaged (reference)
 - Economically Disadvantaged
- Disability Status
 - Students without Disabilities (reference)
 - Students with Disabilities
- English Language Status
 - Not Limited English Proficiency (reference)
 - Limited English Proficiency
- Gender
 - Male (reference)
 - Female

In each category of student subgroups a reference subgroup is determined, based either on it being the larger of the subgroups or because it has the fewest impediments to educational learning. Once the reference group is determined, the other subgroups in the category are compared to the reference group to determine the achievement gap:

Example:

% proficient in Math for White students = 52.7

% proficient in Math for Hispanic students = 40.0

Gap = $40.0 - 52.7 = -12.7\%$

An Increase/Decrease in achievement gap was also calculated for each subgroup to gauge the progress toward closing the proficiency gap between 2018 and 2019. An increase indicates the achievement gap widened, while a decrease indicates the achievement gap closed. To ensure data quality and cross-functional comparability, gap data from the 2017-2018 academic year was recalculated for this trend analysis using common-source data files maintained in the Mississippi Student Information System (MSIS).

The Mississippi Department of Education ESSA goal is for all student subgroups to reach 70% proficiency in all assessed subject areas by 2025. The Gap to State 2025 Goal is the difference between the percent proficient for the student subgroup and 70%.

If the number of students for a subgroup is less than ten (<10), the information for the subgroup is redacted with an asterisk (*). Additionally, if the number of students *tested* for a subgroup is less than ten (<10), the information for the subgroup is redacted with an asterisk (*).

Technical Notes:

- Gap analysis identifies any disparity in assessment proficiency between student subgroups. For example, the gap (or difference) between the percentage of proficient African-American students and the percentage of proficient White students:
 $\% \text{ Proficient White students (reference)} = 51.3$
 $\% \text{ Proficient African-American students} = 22.4$
 $\text{Gap: } 22.4 - 51.3 = -28.9\%$
- Grey shading indicates the reference subgroup, except the "All Students" category which is not being used for comparison
- A negative gap indicates lower performance in the comparison subgroup when compared to the reference subgroup. A positive gap indicates higher performance in the comparison subgroup when compared to the reference subgroup
- The Increase/Decrease in achievement gap indicates whether the gap widened (an increase) or closed (a decrease) between 2018 and 2019.
- The Gap to State 2025 Goal is the difference between the percent proficient for the subgroup and 70%.
