## Using this Document

This multi-volume document *Procedures for State Board Policy 74.19* is intended to assist Public Agencies in the implementation of the State Board of Education Policy 74.19: *State Policies Regarding Children with Disabilities under the Individuals with Disabilities Education Act Amendments of 2004 (IDEA 2004)*.

This document contains information about requirements of IDEA and SBE Policy 74.19, recommendations from the Mississippi Department of Education's Office of Special Education's Division of Instructional Support, and guidance on Best Practices as determined by research and professional practice. Specific directives or requirements of IDEA and/or SBE Policy 74.19 include *must* or *may not* in the statement. Other recommendations and guidance on Best Practices include *should* or *may* in the statements. In addition, all days listed in the document refer to calendar days, unless otherwise noted. The forms in the Procedures documents are not required forms. These forms are suggested or recommended forms designed to assist districts in having the appropriate documentation to use in implementing the requirements of State Board Policy 74.19. The only required forms in the Procedures Document are the Individualized Education Program (IEP) and the Extended School Year Fact Sheet (ESY). A Public Agency may modify these forms or use their own forms as long as they meet the requirements of State Board Policy 74.19.

## **CHAPTER 11: SECONDARY TRANSITION**

**Public Agency** in this document refers to agencies responsible for providing education to children with disabilities including the Mississippi Department of Education (MDE), Local Education Agencies (LEAs), Educational Service Agencies (ESAs), and nonprofit public charter schools not a part of an LEA or ESA.

### **Secondary Transition**

For children fourteen (14) years of age (or younger if determined appropriate by the IEP Committee), SBE Policy 74.19 requires school districts to determine each child's postsecondary goals in the areas of employment, education or training, and, where appropriate, independent living based on age-appropriate assessments. The Policy further defines transition services as a set of coordinated activities designed to be within a results-oriented process, focused on improving the academic and functional achievement of the child with a disability to facilitate the child's movement from school to post-school activities. These post-school activities may include, but not be limited to postsecondary education, vocational education, integrated employment, supported employment, continuing and adult education, adult services, independent living or community participation. The services must be based on the individual child's needs and take into account the child's strengths, preferences and interests. The IEP Committee is further required to develop a coordinated set of activities in the areas of instruction to promote the movement of a child from school to postsecondary adult living. These activities should include community experiences, activities that promote the development of employment and other post-school adult living skills and, if appropriate, activities that promote the acquisition of daily living skills (IDEA, 2004).

#### **What Is Transition?**

The Merriam-Webster Dictionary defines transition as the passage from one stage or place to another. For all children, transition occurs from preschool to elementary school, elementary school to middle school, middle school to high school, and high school to adulthood. For students with disabilities, each stage in transition requires thoughtful planning to ensure students with disabilities are able to transition from one level to the next smoothly. Research has shown that post-school outcomes for students with disabilities improve when students, families, educators, organizations, and community members collaborate to plan and implement transition-focused education that prepares students for postsecondary success.

Even though, State Board Policy 74.19 requires transition services to begin at age 14, or younger if determined appropriate by the IEP Committee, transition for all students begins much earlier.

### **Transition Terms**

*Coordinated set of activities* is a planned and organized sequence of activities based on the student's preferences and interests, which promotes the movement of a student from school to postsecondary adult living. It involves a collaborative effort among various agencies to provide transition services to the student.

*Results-oriented process* is a series of meaningful events to assist the student in achieving desired postsecondary outcomes.

*Postsecondary education* is an organized educational program provided by qualified personnel that is available beyond secondary education including community colleges, vocational-technical colleges and four-year colleges and universities.

*Vocational education* is specialized instruction and practice, by qualified personnel, in a specific field to prepare students to enter into, continue, or upgrade employment in recognized trades or occupations.

*Integrated employment* is paid work in sites and settings that are not unique to individuals with disabilities.

*Supported employment* is paid work that requires the use of designated personnel to assist individuals with disabilities in acquiring and maintaining site-specific skills.

### **Transition and Career Development**

Career development is an essential component of transition. Donald Zunker (1994) refers to career development as "a lifelong process of developing beliefs and values, skills and aptitudes, interests, personality characteristics, and knowledge of the world of work. Specifically, the terms reflect individually developed needs and goals associated with stages of life and with tasks that affect career choices and subsequent fulfillment of purpose." (Zunker, 1994, p. 3).

#### ***Career Awareness***

Career awareness should be addressed throughout preschool and elementary school and should include an understanding of the world of work and the knowledge and skills needed for traditional and nontraditional jobs and careers. Students are aware of opportunities, options, and

roles that interest them in the world of work. They gain an awareness of the importance of personal responsibility, good work habits, and how people work.

Activities for students include, but are not limited to:

- Acquiring general knowledge.
- Understanding the importance of working.
- Acquainting students with local places of employment.
- Understanding the need for cooperation and teamwork.
- Developing social skills, decision-making, problem-solving, self-determination, and self-advocacy skills.

### ***Career Exploration***

In middle school, students begin the process of exploring careers of interest. Career exploration includes investigation of the workplace and understanding of the correlation between personal abilities, education, and the knowledge and skills needed to pursue occupations and careers. Students learn about the variety of careers available and the types of jobs that would best fit their preferences, needs, and interests, as well as explore the requirements related to those jobs.

Activities for students include, but are not limited to:

- Acquiring general knowledge.
- Becoming aware of personal characteristics, interests, aptitudes, and skills.
- Developing an awareness of and respect for the diversity of the world of work.
- Understanding the relationship between school performance and future employment options.
- Developing a positive attitude towards work.
- Developing work ethic and responsibilities.
- Developing social skills, decision-making, problem-solving, self-determination, and self-advocacy skills.
- Completing the iCAP in 8<sup>th</sup> grade.
- Developing Transition Plan by age 14 with active involvement of student.

### ***Career Preparation***

In high school, student focus shifts to career preparation which includes purposeful planning that helps students transition from school to the world of work and higher education. Students should have opportunities to learn about different careers and explore skills needed to be successful in those careers; implement skills that have been fostered and developed while in school; and play a significant role in planning their own successful transition from the secondary to postsecondary environment.

Activities for students include, but are not limited to:

- Demonstrating acquisition of general knowledge.
- Implementing social skills, decision-making, problem-solving, self-determination, and self-advocacy skills.
- Demonstrating work ethic and responsibilities.
- Reviewing and revising the iCAP.
- Volunteering at school and in the community.
- Participating in service learning activities.
- Completing a variety of job shadowing experiences.
- Participating in apprenticeships and/or internships.
- Securing part-time/full-time supported employment and/or integrated employment.
- Implementing the Transition Plan developed by IEP Committee with active involvement of student.

### **Transition Planning**

Transition planning is the process of providing assistance to students, parents, and school personnel as they discuss and plan transition from school to adult life. This planning will include assessing interest and strengths; setting transition goals; and selecting the course of study and exit option; and services and agency linkages needed to meet the transitional goals for students with disabilities. Transition planning can begin as early as elementary school. School personnel should begin the process with students and parents by discussing the educational progress and needs of the student, taking into consideration the expectations and aspirations of the student. The process should include discussions concerning future goals and skills needed to support the transition goals.

When the student is in middle school, school personnel should begin using career assessments to identify the career interests, abilities and needs of the student. The assessment data should be used to develop appropriate programming, including courses of study, focused on preparing the student to meet his/her postsecondary goals. Public agencies/schools must provide information to students and parents regarding different diploma/exit options for students with disabilities.

The transition planning process is an ongoing process that can change over time, depending on the student's preferences, strengths, and interests. Transition planning **must** be addressed during the IEP meeting the year the student turns 14 and **must** be reviewed annually.

## Considerations for Secondary Transition

Many students with disabilities leave high school unprepared for success in their postsecondary lives. Parents and students often do not understand the differences between the responsibilities of secondary schools and the responsibilities of postsecondary settings (e.g., college/university and employment). Educators, parents, and students must understand the differences between IDEA at the secondary level and Section 504 and the Americans with Disabilities Act (ADA) at the postsecondary level. Schools have a responsibility to provide parents and students with information related to postsecondary options. Considerations are as follows:

- Secondary personnel, parent(s), and student(s) need to be aware that postsecondary level institutions/environments have different expectations and obligations than secondary schools.
- It must be clear that the specific accommodations or supports are just **recommendations** that do not limit the independent decision-making of personnel at the postsecondary level.
- Section 504 and the ADA require students to self-identify and provide documentation of their disability to be eligible for accommodations and services in postsecondary settings. As a result, students with disabilities must have opportunities to make independent choices and decisions and to practice self-advocacy skills to prepare for life after high school.
- Under IDEA, students are **entitled** to a free and appropriate public education (FAPE). Colleges provide **equal access** to education. No one is **entitled**, but students must advocate for their **civil rights**.
- Postsecondary schools provide supports based on what is **reasonable** rather than what is **appropriate** or **least restrictive**. Support services and accommodations are based on providing **access to content** and **reduction of barriers to learning** rather than promoting achievement.
- Documentation of disabilities varies widely between postsecondary schools and students must be aware of those requirements as they apply to different schools.
- Most postsecondary schools do provide some level of support, but the type and scope of this support varies widely among institutions.
- The Office for Civil Rights provides guidance for special educators who are preparing students with disabilities for postsecondary education on their website.

## Comparison of Special Education and Section 504 of the Rehabilitation Act of 1973

	Secondary Education	Section 504
<b>Legislation</b>	<i>Individuals with Disabilities Act 2004 (IDEA)</i>	<i>Section 504 of the Rehabilitation Act of 1973</i>
<b>Identification</b>	The public agency is required to identify all individuals under Child Find.	The consumer is required to self-identify as a person with disabilities to the public agency.
<b>Evaluation</b>	The public agency is required to conduct an evaluation to determine eligibility for special education services for any individual suspected of having a disability.	The consumer is required to provide documentation of his/her disability to be determined to be eligible for vocational rehabilitation services.
<b>Eligibility Determination</b>	Eligibility is determined by meeting the criteria for one of the disability categories identified by IDEA and State Board Policy 74.19, including having a disability that has adverse educational impact and needing special education services to progress in the general education curriculum.	Eligibility is determined by having a physical or mental impairment that constitutes or results in a substantial impediment to employment and needing vocational rehabilitation services to prepare, secure, retain, or regain employment.

## Role of IEP Committee Members in Transition Planning

### Student's Role

Beginning no later than age 14, or earlier if appropriate, students with disabilities should participate in the development of their individualized education programs. During IEP Committee meetings, students should take an active role in selecting their graduation option and determining the needed courses of study based on their desired post-school outcomes.

Child's Invitation to the IEP Committee Meeting		
The child was invited to the IEP meeting.	<input type="checkbox"/> Yes	<input type="checkbox"/> No

The secondary transition plan should be developed based on the child's strengths, preferences, and interests. Children with disabilities, when turning 14, and at the discretion of their parents, should be invited to attend the IEP Committee meeting when the child's transition goals, services, exit options, and course of study are to be discussed.

Students with disabilities must learn and use self-determination/self-advocacy skills to become active participants in making educational decisions that will affect their future. The student must learn to identify his/her strengths and needs and have an understanding of his/her rights.

The student should<sup>1</sup>:

- Participate actively in all discussions and decisions.
- Communicate his/her strengths, preferences, and interests.
- Communicate his/her areas where help is needed.
- Communicate how he/she is doing in classes and what accommodations, modifications, and supports are needed to be successful in the general education classes.
- Communicate how he/she is doing with his/her community experiences and what accommodations, modifications, and supports are needed to be successful in those environments.
- Take the opportunity to lead his/her own IEP meetings. This participation will likely require coaching, training and practice.

### **Parents' Role<sup>2</sup>**

Parents must be advocates for their children. They are responsible for keeping the Committee focused on the student's transitional needs and goals. Parents have many responsibilities in transition and should:

- Learn all they can about the post-high school options and resources available to the student.
- Discuss with the student his/her future goals.
- Determine how much assistance the student will need to acquire independence.
- Share information with the IEP Committee about the student's strengths, needs, and preferences.
- Assist the student in the development of self-advocacy skills.
- Provide supplemental support for the student, e.g., providing transportation to and from a job site if appropriate.
- Ensure the IEP goals are being accomplished.
- Ensure academic advisement is provided for students choosing postsecondary education as a post-school outcome.
- For students not bound for postsecondary education, ensure their IEP addresses community-based vocational training/mobility and travel training/community-based life skills instruction.
- Help ensure needed curriculum adaptations and environmental modifications are made.

- Monitor student's progress on goals that are stated in the IEP and transition plan.

### **School's Role<sup>3</sup>**

The special education teacher should:

- Provide information on the student's strengths, past achievements, and progress on the current IEP.
- Provide strategies for effectively teaching the student, including appropriate accommodations and/or modifications, so the student can successfully access and progress in the general curriculum.
- Suggest courses of study and educational experiences that relate to the student's preferences and interests and that provide a foundation and skills to help the student achieve his or her desired post-school goals.
- Identify needed related services.
- Provide appropriate input into transition service needs and postsecondary agencies, services and/or supports and incorporate those into the IEP.
- Link students and parents to the appropriate post-school services, supports, or agencies before the student *exits* high school.
- Coordinate all the people, agencies, services, or programs in the transition planning.

The regular education teacher should:

- Assist in planning the courses of study in the general curriculum that will assist the student in achieving his or her desired postsecondary goals.
- Assist in identifying and providing needed modifications, adaptations, and supports for school personnel to assist the student in the regular education setting and on state- and district-wide assessments.
- Assist in identifying and providing needed positive behavioral strategies or interventions to assist the student in the regular education setting.

### **Agency Representative's Role**

The local education agency (LEA) representative should:

- Support the special and general education staff.
- Allocate the necessary resources to ensure the IEP is implemented.

## **Interagency's Role<sup>4</sup>**

The interagency representative should:

- Provide information about services and eligibility criteria for community or adult services and supports (e.g., college support services and financial aid, vocational rehabilitation services, family services, social security work incentives).
- Help explain the differences between the entitlement of school programs and eligibility of adult services.
- Assist in identifying community or adult services that may assist the student in achieving his or her post-school goals.
- Assist the student and his or her family in application processes for supports and services at colleges, training institutions, or adult services, as appropriate.
- Alert families and the school to potential waiting lists for services.
- As appropriate, provide services to the student prior to exiting the school system.

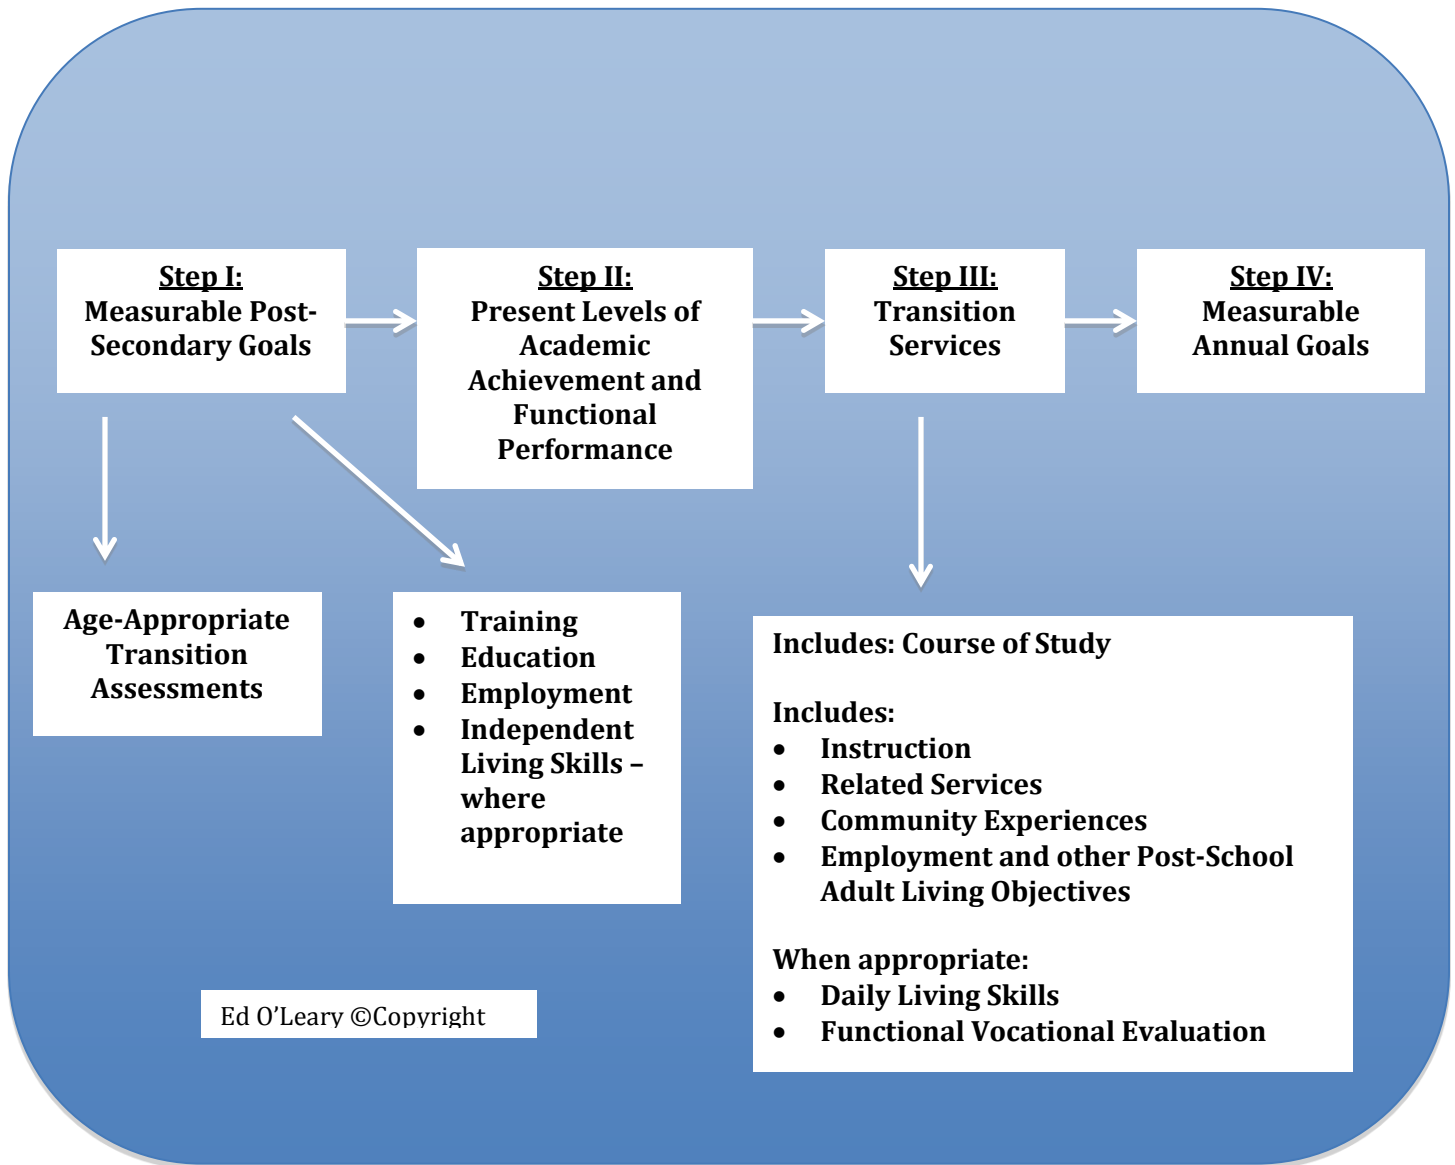

## **Best Practices for Student-Directed IEPs:**

- Provide instruction in the classroom setting on self-determination/self-advocacy skills and skills related to understanding the purpose of the IEP process.
- Provide instruction on the legal rights of an individual with a disability and the impact of having a disability.
- Provide instruction on the transition services required under **IDEA**.
- Include students with disabilities in the development of their four-year educational/career plan.
- Role-play IEP meetings to help students understand the IEP process and requirements.
- Encourage students to advocate and conduct their IEP Committee meetings.
- Assist students with preparation for IEP meeting (e.g., organize notes, create agenda or Power Point).
- Encourage students to communicate with school personnel to monitor progress toward the IEP goals.

## Transition Planning: The Process

## Age-Appropriate Transition Assessments

IDEA 2004 requires a student’s measurable postsecondary goals to be based upon chronological age-appropriate assessments related to training, education, employment, and, where appropriate, independent living skills [§300.320(b)(1)].

SBE Policy 74.19 requires the use of age-appropriate transition assessments to develop appropriate measurable postsecondary goals in education/training, employment, and, where appropriate, independent living skills. The Council for Exceptional Children’s Division on Career Development and Transition defines transition assessment as an “...ongoing process of collecting data on the individual’s needs, preferences, and interests as they relate to the demands of current and future working, educational, living, and personal and social environments. Assessment data serve as the common thread in the transition process and form the basis for defining goals and services to be included in the IEP.”

Formal and/or informal age-appropriate transition assessments **must** be used to identify a student’s needs, preferences, and interests as they relate to the demands of current and future working, education, living, and personal and social environments. Age-appropriate transition assessments **must** be updated annually. At least one age-appropriate transition assessment **must** be listed for each postsecondary goal developed. Transition assessments should describe the types of skills and knowledge the student needs to develop to achieve his/her postsecondary goals. Assessments should be selected based on the information needed to create an effective transition plan for the student. Examples of age-appropriate assessments that are useful for transition planning include: assessments of adaptive behavior/daily living skills, aptitude tests, achievement tests, interest inventories, temperament inventories, self-determination assessments, transition planning inventories, and career maturity and employability tests.

Results of the age-appropriate assessments used for transition planning should be included in the Present Levels of Academic Achievement and Functional Performance (PLAAFP) and assist the IEP Committee in prioritizing possible postsecondary goals. Transition assessments form the basis for defining goals and services included in the IEP.

Age-Appropriate Transition Assessments					
Transition Assessment <i>(including child and family survey or interview)</i>	Assessment Type	Responsible Agency/Person	Date Conducted	Report Attached	Needed
<b>Education/Training (Required)</b>					
<b>Employment (Required)</b>					
<b>Independent Living (If Appropriate)</b>					

1. **Assessment Type:** Record the assessment used to develop the child’s postsecondary goals.  
*Examples: student survey, parent survey, iCAP, career interest inventory, TABE*
2. **Responsible Agency/Person:** Record the agency/person responsible for assessing the child.  
*Examples: teacher, school, Vocational Rehabilitation*
3. **Date Conducted:** Identify the date(s) of any assessment conducted. *Assessments must be conducted before the development of appropriate measurable postsecondary goals.*
4. **Report Attached:** Place a “Y” for yes to indicate the report summarizing the results for the assessment(s) is attached to the IEP or “N” for no to indicate the report can be found in the student’s IEP folder. *The report of the assessment should include the date(s) of the assessment(s); name, title, and qualifications of the examiner(s), informants, and observers; results of the assessment(s); and a summary of the interpretations of the assessments and implications for the child’s education/training, employment, and, where appropriate, living skills.*
5. **Needed:** Place a “Y” for yes or “N” for no to indicate if additional assessment is needed in the area. *If any assessment is needed, record this as a transition service to be provided.*

### Resources for Formal and Informal Assessments

There are two types of assessments: formal and informal assessments. Formal assessments are standardized tests that have specific procedures for administration, scoring and interpreting, and are generally compared to other students. Informal assessments are not as structured, nor are they compared to other students.

Formal Assessments	Examples
<b>Adaptive Behavior/Daily Living Skills</b> - help identify the type and amount of support a student may need.	Vineland Adaptive Behavior Scales AAIDD Diagnostic Behavior Scale AAMR Adaptive Behavior Scales Adaptive Behavior Inventory
<b>Aptitude Tests</b> – measure skills and abilities.	Armed Services Vocational Aptitude Battery OASIS-III Aptitude Survey Wiesen Test of Mechanical Aptitude Test of Adult Basic Education (TABE)
<b>Achievement Tests</b> - measure learning of general or specific academic skills.	Woodcock Johnson Test of Achievement Kaufman Test of Educational Achievement ACT District and Statewide Assessments
<b>Interest Inventories</b> - provide information about a student’s preferences for certain	Individual Career and Academic Plan (iCAP) Department of Labor <a href="http://www.onetcenter.org">www.onetcenter.org</a>

## Present Levels of Academic Achievement and Functional Performance

The Present Levels of Academic Achievement and Functional Performance (PLAAFP) provide the IEP Committee a snapshot of a student's abilities at the time the IEP was developed. The IEP Committee **must** identify where the student is functioning (strengths and needs) in relationship to what he/she plans on doing after exiting high school. The PLAAFP **must** include the results of any age-appropriate assessments used to determine strengths, needs, interests, and preferences.

PRESENT LEVELS OF ACADEMIC ACHIEVEMENT AND FUNCTIONAL PERFORMANCE
<b>Child's Strengths, Preferences, and Interests</b>
<i>Identify the child's educational and/or developmental strengths, interest areas, significant personal attributes and personal accomplishments as indicated by formal or informal assessment. Identify the skills or behaviors the child has mastered. Be sure to include specific feedback from the child. <b><u>If 14 years of age or older, describe the child's strengths, preference and interests related to their postsecondary expectations (education, employment/training and daily living if appropriate).</u></b></i>
<i>List data sources relative to describing the child's strengths, preferences and interests (e.g. interviews, formal assessments, informal assessments etc.).</i>
<b>Impact of Disability and Child Needs (Critical Skills and Behaviors or Developmentally Appropriate Activities)</b>
<i>Describe the effects of the child's disability on involvement and progress in the general education curriculum, including the impact on the child's current level of functioning in reading and math and the functional implications of the child's skills. For a preschool child, describe the effect of this child's disability on involvement in developmentally appropriate activities. <b><u>If 14 years of age or older, describe the effect of this child's disability on the pursuit of postsecondary expectations (education, employment/training and daily living if appropriate).</u></b></i>
<i>List data sources relative to describing the child's needs and impact of his/her disability (e.g. progress monitoring, observations, assessments, etc.).</i>

### Example of strengths, preferences, and interests related to postsecondary expectations:

- Based on a career interest survey and student interview, Pam enjoys working with children in her church nursery. She would like to live on campus while attending college to pursue a degree in early childhood education. Eventually, Pam wants to open her own childcare center. Her determination and positive attitude will help her attain her postsecondary goals.
- Pam has difficulty comprehending content-related informational texts. She benefits from receiving vocabulary words and definitions prior to lessons. Pam's difficulty with understanding new material presented in content-specific classes may impact her ability to successfully complete college-level courses with large amounts of required text.

## Postsecondary Goals

Postsecondary goals are the desired outcomes for a child **after** he/she leaves high school in the areas of employment, education/training, and, where appropriate, independent living skills. These goals **must** be appropriate, measurable, and related to his/her strengths, preferences, and interests. The IEP Committee **must** review postsecondary goals annually and revise if needed based on the student’s strengths, preferences, and interests.

Appropriate measurable postsecondary goals **must** be developed based on information gained through age-appropriate assessments. **The IEP Committee must develop at least one annual IEP goal AND identify at least one transition service for each postsecondary goal.**

Postsecondary Goals		
<i>Specify appropriate measurable postsecondary goals as identified by the child, parent(s) and IEP Committee. Postsecondary goals are based upon <b>age-appropriate transition assessments</b> related to employment, education and/or training, and, where appropriate, independent living skills.</i>		Related IEP Goal(s) #
<b>Education/Training (Required)</b>		
<b>Employment (Required)</b>		
<b>Independent Living (If Appropriate)</b>		

### Questions to consider when determining postsecondary goals:

- Where and how is the student going to continue to learn and/or develop skills after graduation/exit from high school?
- Where is the student going to work or engage in productive activities after graduation/exit from high school?
- Where is the student going to live and how is he or she going to access adult services, participate in the community, and have fun after graduation/exit from high school?

### Examples of Postsecondary Education or Training Outcomes:

- Community College
- University
- Vocational Training Program
- Career/Technical School
- GED
- Apprenticeship/Internship
- Job Corp
- On-the-Job Training with Vocational Rehabilitation
- Independent Livings Skills Training
- Job Coach

**Examples of Postsecondary Employment Outcomes:**

- Competitive Employment
- Supported/Integrated Employment
- Customized Employment
- Military
- Volunteer Work
- Full-Time Employment
- Part-Time Employment

**Examples of Postsecondary Independent Living Outcomes:**

- Use public transportation independently or with support
- Live independently with a roommate
- Supported living
- Participate in community-based activities
- Attend sporting events
- Monitor medications
- Assist with personal care

**Writing Measurable Postsecondary Goals**

Postsecondary goals identify an outcome, not a process or activity. The following are **NOT** measurable examples:

- The student plans to...
- The student hopes to...
- The student wishes to...
- The student would like to...
- The student wants to...

The following formula from NSTTAC provides a guideline for writing measurable postsecondary goals:

\_\_\_\_\_ will \_\_\_\_\_  
(After high school)      (The student)      (Behavior)      (Where and how)  
(Upon completion  
of high school)  
(After graduation)

Only use “graduation” if the student is receiving a general education diploma.

## **Examples of Postsecondary Goals**

### ***Education/Training:***

- After high school, Zack will enroll in the LPN program at Lincoln Community College with supports from disability services.
- After graduation, Sarah will enroll in Mississippi State University to obtain a degree in business.
- Upon completion of high school, Tom will complete a CPR course to volunteer at the fire department.
- After high school, Amy will receive on-the-job training with a job coach to prepare for integrated employment.
- Upon completion of high school, Andrew will attend a pre-vocational day center with an adult curriculum focused on gaining independent living skills and vocational skills.

### ***Employment:***

- After high school, William will obtain a supported employment position with a job coach to prepare for future integrated employment.
- After graduation, Allison will obtain a part-time job as a lifeguard while attending college.
- Upon completion of high school, Joel will work full-time in the sports industry.
- After high school, Marie will volunteer in the nursery at her church.
- After graduation, Greg will work part-time with a job coach in the dining hall at his college.

### ***Independent Living:***

- After high school, Jennifer will continue to live with her parents and participate in her daily care routines to the maximum extent possible.
- Upon completion of high school, Ben will maintain a budget, pay his own bills and save money in preparation to share an apartment with a friend.
- Upon completion of high school, Nancy will live in an apartment and participate in community activities with supports.
- After high school, Kevin will use his augmentative communication device at home and in the community to communicate his needs and wants with familiar and unfamiliar people.
- After high school, Emily will use her self-determination skills to ask for needed supports in her college courses.

## Transition Services

Transition services are defined by IDEA as a coordinated set of activities for a child with a disability that:

- Is designed to be within a results-oriented process, that is focused on improving the academic and functional achievement of the child with a disability to facilitate the child's movement from school to post-school activities, including postsecondary education, vocational education, integrated employment (including supported employment); continuing and adult education, adult services, independent living, or community participation;
- Is based on the individual child's needs, taking into account the child's strengths, preferences, and interests; and
- Includes instruction, related services, community experiences, development of employment and other post-school adult living objectives, and, if appropriate, acquisition of daily living skills and functional vocational evaluation. [§34 CFR 300.43 (a)].

The type and amount of transition services will differ from student to student. At least one transition service **must** be identified for each measurable postsecondary goal.

*List of Coordinated Set of Activities and Strategies* (see Appendix) has examples of transition services for each area of need.

To identify appropriate transition services, the IEP Committee needs to consider<sup>5</sup>:

- What services, supports or programs does the student CURRENTLY need?
- What services, supports or programs will the student need IN THE FUTURE in order to achieve his/her post-school goals?
- Is the student linked to the needed postsecondary services, supports, or programs before he/she leaves the school setting?

**Instruction:** Formal or informal instruction to impart knowledge and skills needed to achieve postsecondary goals. For example:

- Attend tutoring sessions at school
- Participate in self-advocacy training
- Complete a computer skills class
- Receive instruction in self-management related to behavior
- Enroll in driver's education course
- Enroll in career technical program

---

<sup>5</sup> Transition Services Liaison Project. *Technical Assistance Guidance for Transition in the IEP*. Publication. N.p.: n.p., 2009. Print.

**Related services:** Specifies related services needed for successful transition to post-school life and what the student will need to access those services. For example:

- Visit community mental health agencies in the area
- Identify potential post-school providers for recreation therapy, occupational therapy, speech therapy, or physical therapy
- Apply for home-based waiver
- Apply for Supplemental Security Income (SSI)
- Use augmentative communication device in a work setting
- Receive orientation and mobility training in a work setting

**Community experiences:** Specifies activities or experiences generally provided off school campus and to prepare student for participation in community life. For example:

- Develop skills to grocery shop independently
- Complete job shadowing experiences
- Tour postsecondary institutions
- Explore leisure and recreation activities in the community
- Investigate participation in community civic organizations or sports teams
- Practice banking and budgeting skills

**Employment objectives and functional vocational evaluation:** Specifies activities focused on development of work-related behaviors, career exploration, skills training, and any assessments needed to provide information about career interests, aptitudes, and skills. For example:

- Join career-related school clubs such as Future Business Leaders of America
- Register to vote
- Take the ASVAB
- Meet with Supported Employment agencies to evaluate their services
- Learn about legislation identifying the rights of adults with disabilities (i.e., the Americans with Disabilities Act and Section 504 of the Rehabilitation Act) to appropriately self-advocate
- Meet with counselor from Vocational Rehabilitation

**Acquisition of daily living skills and other post-school adult living objectives:** Specifies activities focused on development of skills adults need in everyday life. For example:

- Identify services provided by banks
- Enroll in child development class
- Learn about managing/maintaining/performing simple repairs on a home
- Manage daily schedule
- Enroll in culinary arts class
- Register to vote

<b>Transition Services</b>	
<i>Transition services may include instruction, related services, community experiences, development of employment and other post-school adult living objectives, and acquisition of daily living skills to be provided before graduation to support the child in achieving his/her postsecondary goals.</i>	
<b>Instruction</b> (e.g., accommodations, tutoring, skills training, prep for college exam)	
<i>List the activities the school, child, parent and any outside agency(ies) will do to help the child reach the stated post-secondary goal(s). Specify any outside agency(ies) that will provide transition services.</i>	
<b>Related Services</b> (e.g., parent(s), technology, transportation, medical services, supported services)	
<i>List the activities the school, child, parent and any outside agency(ies) will do to help the child reach the stated post-secondary goal(s). Specify any outside agency(ies) that will provide transition services.</i>	
<b>Community Experiences</b> (e.g., job, institutions)	<b>Development Of Employment Objectives and Functional Vocational Evaluation</b> (e.g., career planning, guidance counseling, job and career interests, aptitudes and skills)
	<i>List the activities the school, child, parent and any outside agency(ies) will do to help the child reach the stated post-secondary goal(s). Specify any outside agency(ies) that will provide transition services.</i>
<i>List the activities the school, child, parent and any outside agency(ies) will do to help the child reach the stated post-secondary goal(s). Specify any outside agency(ies) that will provide transition services.</i>	<b>Acquisition Of Daily Living Skills and Other Post-School Adult Living Objectives</b> (e.g., self-care, home repair, health and safety, money management, registering to vote, adult benefits planning, independent living)
	<i>List the activities the school, child, parent and any outside agency(ies) will do to help the child reach the stated post-secondary goal(s). Specify any outside agency(ies) that will provide transition services.</i>

- 1. Instruction:** List any instructional activities related to a postsecondary goal completed by the school, child, parent, and/or outside agencies.
- 2. Related services:** List any activities that address access to postsecondary related services needed to meet postsecondary goals. Activities may be completed by the school, child, parent, and/or outside agencies.
- 3. Community experiences:** List any activities conducted outside of school that will prepare students to meet postsecondary goals. Activities may be completed by the school, child, parent, and/or outside agencies.
- 4. Development of employment objectives and functional vocational evaluation:** List any activities conducted by the school, child, parent, and/or outside agencies to assist the child in achieving his/her employment postsecondary goals or determining career interests, aptitudes, and skills.
- 5. Acquisition of daily living skills and other post-school adult living objectives:** List any instruction or experiences provided by the school, child, parent, and/or outside agencies to assist the child in functioning independently as an adult.

## Course of Study

A course of study is the list of courses the child requires to achieve his/her desired exit option. The child's course of study contains the sequence of courses the child needs to achieve her/his postsecondary goals. The child's general education teacher and guidance counselor must be involved in the collaborative decision-making process for determining the child's course of

study. Like the child's desired postsecondary goals, the child's course of study must be determined on the basis of the child's strengths, interests, and preferences.

When selecting the course of study for the child, the IEP Committee must consider the specific requirements for each exit option and the specific entry requirements for the postsecondary college or career selected. For example if a child's postsecondary goal is to attend a college or university immediately after high school, he/she must have a course of study leading to a standard high school diploma and/or complete a GED program in lieu of a diploma. If a child's postsecondary goal is to enlist in the military, he/she should have a course of study leading to a standard high school diploma as the military rarely accepts applicants with a GED without additional college coursework and/or a high Armed Services Vocational Aptitude Battery (ASVAB) score. If a child's postsecondary goal is to become a commercial driver, the child's course of study will depend upon both the specific exit option selected and the postsecondary training program pursued. As some commercial driver training programs require a standard high school diploma or GED while others do not, the child may be able to exit with a standard high school diploma, GED, MOD, or Certificate of Completion and still pursue his/her postsecondary goal depending upon the entry requirements of the commercial driver training program selected.

**When selecting the child's course of study, ask:**

- What is the child's postsecondary goal(s) in education and what course of study will appropriately prepare the child to succeed in his/her chosen postsecondary educational or training program?
- What is the child's postsecondary goal(s) in employment and in what career cluster is the child's desired employment?
- What course of study will appropriately prepare the child to succeed in his/her chosen postsecondary career or employment option and/or to complete any required degree, certification, or training program for his/her desired career?
- What classes support the child in obtaining his/her desired exit option?
- What classes are available that support the child's efforts to achieve his/her desired postsecondary goals in education, employment, and, if applicable, independent living?
- Do the child's projected classes for the course of study have prerequisite classes that will need to be sequenced?

The course of study that supports the child's postsecondary goals are based on the federal list of employment types. They include:

- Agriculture, Food and Natural Resources
- Architecture and Construction

- Arts, Media, and Communications
- Business Management and Administration
- Education and Training
- Finance
- Government and Public Administration
- Health Science
- Hospitality and Tourism
- Human Services
- Information Technology
- Law, Public Safety, and Security
- Manufacturing
- Marketing
- Science, Technology, Engineering and Mathematics
- Transportation, Distribution, and Logistics

Additional options for children who meet the criteria for having a significant cognitive disability (SCD) include:

If the child does not meet the criteria for an SCD, leave this section blank.
- 3. Enrolled Classes:** List the specific general or special education class(es) in the child's course of study for which she/he:

- a. Has already completed during previous school years.
- b. Will enroll for the current school year. *The list of current year's classes is not a guarantee that the child will successfully complete these courses.*
- c. Intends to enroll in future school years. *The projected year list of classes is not a guarantee that the child will be able to enroll in or successfully complete these courses. The intention of listing these classes is to enable the IEP Committee to plan the child's course of study accounting for appropriate sequencing of prerequisite classes and balancing class loads over the child's high school years.*

### **Interagency Linkages**

Interagency linkages are developed with agencies and/or their representative(s) who are currently involved with the child or family or are likely to become involved in providing support or services once the child exits high school and transitions into postsecondary education/training, employment, and the community. Representatives of these agencies may be able to provide critical information to assist the IEP Committee in planning for secondary transition and/or to provide transition services. Written parental consent must be obtained prior to inviting an agency representative to attend an IEP Committee meeting or to become an IEP Committee member.

In Mississippi, agencies commonly involved in transition planning or services include:

- **Vocational Rehabilitation Agency (VR):** Funded by Federal and State monies, VR agencies typically operate regional and local offices and provide assistance to people with cognitive, sensory, physical, or emotional disabilities to attain employment and increased independence. VR services are available for a limited period of time based on an individual's rehabilitation plan.
- **Mental Health Agencies:** Funded by Federal, State, and (primarily) local monies, mental health agencies, operated out of regional offices, provide a comprehensive system of services responsive to the needs of individuals with mental illness or Intellectual Disabilities on a sliding payment scale.
- **Independent Living Centers (ILC):** Operated locally, ILCs help people with disabilities achieve and maintain self-sufficient lives within the community. Some services, such as classes, may require fees; however, other services, such as advocacy services, are typically available at no cost.
- **Social Security Administration (SSA):** Funded by Federal monies, the SSA operates several programs that provide benefits for people of any age who are unable to do substantial work and have severe mental or physical disabilities, including Social Security Disability Insurance (SSDI), Supplemental Security Income (SSI), Plans to Achieve Self-Support (PASS), Medicaid, and Medicare.
- **Department of Health:** Funded by Federal and State monies, health departments assist individuals with physical or mental disabilities obtain employment and live more

independently through the provision of counseling, medical and psychological services, job training, and other individualized services.

- **The Mississippi Council on Developmental Disabilities:** Funded by the Federal Administration on Developmental Disabilities, the MSCDD supports nine area programs for children and parents of children with disabilities: Child Care, Community Supports, Education and Early Intervention, Employment, Health, Housing, Transportation, Quality Assurance, and Recreation.

The IEP must list any agencies currently involved or that are likely to become involved with the child/family who can provide information or services related to education or training, employment, and, where applicable, independent living. Written parental consent must be obtained before inviting any representative of one of these agencies to the IEP Committee meeting.

Interagency Linkages (Participating Agencies)		
List any agencies/person(s) (a) currently involved with the child or family, (b) who can provide needed information to the IEP Committee and/or (c) likely to become involved in providing support or services after the child exits high school and transitions to the community, employment and/or postsecondary education/training. <b>Written parental consent must be obtained before inviting any agency/person(s) likely to be responsible for providing/paying for transition services.</b>

### Annual IEP Goals Aligned to Transition

The IEP Committee **must** develop at least one annual IEP goal for each postsecondary goal. Annual IEP goals should help the student make progress towards his/her postsecondary goals. Measurable annual goals have four components: (a) condition, (b) behavior, (c) criteria, and (d) timeframe.\*

Condition	Behavior	Criteria	Timeframe
Given real world problems and visual fraction models	Blake will compute fractions with unlike denominators involving adding, subtracting, and dividing	with 70% accuracy in 4 out of 5 trials	in 36 weeks.

#### **Postsecondary goal for education/training:**

After high school, Zack will enroll in the LPN program at Lincoln Community College with supports from disability services.

#### **Annual IEP goal aligned to education/training postsecondary goal:**

Given a grade-level informational text, Zack will identify and determine the meaning of denotative and connotative words and phrases with 75% accuracy in 36 weeks. (RI.9.4)

**Explanation:**

Zack will need to improve his reading skills to graduate with a regular diploma and meet the entrance requirements for college. Reading skill will also be an essential component in his college classes.

**Postsecondary goals for employment:**

After high school, William will obtain a supported employment position with a job coach to prepare for future integrated employment.

**Annual IEP goal aligned to employment postsecondary goal:**

In 36 weeks, during community-based work experiences, when given a task with 3 or more steps, William will follow verbal directions, stay on-task, and complete the task with 2 or fewer verbal prompts in 4 out of 5 trials.

**Explanation:**

Following directions and completing tasks will be critical skills for employment.

**Postsecondary goals for independent living:**

Upon completion of high school, Scott will participate in his community by using self-determination skills.

**Annual IEP goal aligned to independent living goal:**

While in the community at a variety of settings (store, restaurant, gym), Scott will identify appropriate people to ask for information related to setting and use his communication device to ask one question and make one response in 4 out of 5 consecutive trials.

**Explanation:**

Scott will need to improve his self-determination and communication skills to navigate his community independently.

\*Additional guidance for writing measurable annual IEP goals can be found in the IEP Development Guidance on the MDE website.

## Exit Options

One of the most important decisions the IEP Committee will make for a child with a disability is identifying his/her exit option. The range of postsecondary education, training, and employment opportunities to which the child will be able to gain access will be greatly impacted by the exit option selected. This decision will have lifelong implications for the child as well as his/her family and community.

Exit Options					
<i>Exit options must be reviewed with the parent and the child, as appropriate, before completing this section.</i>	The exit option determined appropriate for the child is: <table style="width: 100%; margin-top: 5px;"> <tr> <td style="width: 25%;"><input type="checkbox"/> Standard High School Diploma</td> <td style="width: 25%;"><input type="checkbox"/> Mississippi Occupational Diploma</td> <td style="width: 25%;"><input type="checkbox"/> District GED Option Program</td> <td style="width: 25%;"><input type="checkbox"/> Certificate of Completion</td> </tr> </table>	<input type="checkbox"/> Standard High School Diploma	<input type="checkbox"/> Mississippi Occupational Diploma	<input type="checkbox"/> District GED Option Program	<input type="checkbox"/> Certificate of Completion
<input type="checkbox"/> Standard High School Diploma	<input type="checkbox"/> Mississippi Occupational Diploma	<input type="checkbox"/> District GED Option Program	<input type="checkbox"/> Certificate of Completion		

Mississippi currently offers the following exit options:

- **Standard High School Diploma:** The standard high school diploma is the only option leading to *graduation*. There are three pathways: Traditional, District, and Career Pathways. See the *Mississippi Public Schools Accountability Standards* for more information.
- **District General Educational Development (GED) Option Program:** The GED is a high school equivalency credential earned through successful completion of a group of subject area assessments that measure high school level college- and career-readiness skills. Some school districts offer GED preparatory programs, referred to as the GED Option Program.
- **Mississippi Occupational Diploma (MOD):** The MOD is not a standard high school diploma nor is it considered a high school equivalency credential for most postsecondary education and training programs or Federal financial aid programs. Rather the focus of this option is to teach employability skills and prepare children with disabilities for competitive employment. The MOD requires (a) an occupational diploma portfolio, (b) the successful completion of a two-year Career/Technical/Vocational Program or documentation of at least five hundred forty (540) hours of successful, paid employment, and (c) twenty-one (21) credits earned by successfully completing selected courses from the general education curriculum, vocational education programs, and/or MOD portfolio objectives. See the *Mississippi Public Schools Accountability Standards* for more information.
- **Certificate:** A Certificate of Completion is not a high school equivalency credential but rather an acknowledgement of the child’s participation in and completion of his/her IEP.

When selecting the exit option for a child, the IEP Committee must consider the child’s post-secondary goals and his/her progress in the educational environment. For example, for a child who can meet high school college and career readiness standards but lacks sufficient credits, will soon age out of eligibility, and is at-risk of dropping out of school, a district GED Option Program may be a viable option. For a child who meets the guidelines for SCD, a Certificate of Completion is a viable option.

Exit options must be reviewed with the parent and, if appropriate, the child before making the determination or listing it on the child's IEP.

**When selecting the child's exit option, ask:**

- What is the child's postsecondary goal(s) for education and what exit option is required for the child to gain entry into that type of educational program?
- What is the child's postsecondary goal(s) for employment and what preparation and/or certification is required to gain entry into the career field?
  - Is a particular exit option required to gain entry into the career field?
  - Is completion of a degree, certification, or training program required for the child's desired career or employment option?
- How many requirements for each exit option has the child currently met?
- How much time does the child have to meet the remaining requirements before turning twenty-one (21) years of age and aging out of eligibility for special education services?

### **Changing Graduation Options**

When considering the diploma/exit option for a student with a disability, the IEP Committee should review the student's long-term goals as it relates to education, and/or employment and independent living goals to ensure that the appropriate diploma/exit option and course of study are selected. The IEP Committee should always begin with the view that one of the Standard High School diploma choices would be first, as it is the least restrictive option and affords the student greater postsecondary outcomes. The IEP Committee can then proceed along the continuum to the District GED Option, the MOD, and finally the Certificate option. All options should be based upon the data specific to the individual learner, always taking into consideration the student's interests and preferences. Whenever there is indecision regarding which diploma/exit option would be the most appropriate for the student, the IEP Committee is strongly encouraged to select the higher of the options being considered. The IEP Committee should review the diploma/exit option selected annually, if necessary, for changes needed to the student's course of study and/or program supports. Please note however, that changes in diploma options in the student's high school program may result in additional time needed to obtain the credits required to graduate.

## Transfer of Rights

Beginning at least one year before the child reaches the age of majority under State law at twenty-one (21) years of age, the student's IEP must include a statement that the student has been informed that his/her rights under IDEA will transfer to the child on reaching the age of majority. If the public agency receives notice of the student's legal incompetency, so that no transfer of rights to the student at age twenty-one (21) occurs, the IEP need not include the statement.

TRANSFER OF RIGHTS
I have been informed of my rights under Part B of the Individuals with Disabilities Education Improvement Act (IDEA) of 2004, as amended, that will transfer to me when I reach the age of majority (21 years of age).

## Summary of Performance

When students exit from special education, public agencies are required to provide them with a Summary of Performance (SoP) to facilitate their transition to desired postsecondary settings.

- Summary of Performance: Public agencies will ensure that an SoP is designed for the student who will exit with a standard high school diploma, will exit through the District GED Option Program, or due to exceeding the age of eligibility. It provides a summary of academic achievement and performance along with recommendations concerning how to assist the student in meeting postsecondary goals. The SoP is to assist the student in the transition from high school to higher education, training and/or employment. (See Appendix for example.)
- Students who are pursuing the Mississippi Occupational Diploma (MOD) will have an occupational portfolio which serves the same purpose as the SoP in the facilitation of transition to the student's desired postsecondary setting.

## Evaluating Your Transition IEP Using Indicator 13

The Mississippi Department of Education, Office of Special Education has identified the Indicator 13 Checklist (see Appendix) as the tool to evaluate your transition IEP. Indicator 13 measures "Percent of youth with IEPs aged 16\* and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition service needs. There also must be evidence that the student was invited to the IEP Committee meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Committee meeting with the prior consent of the parent or student who has reached the age of majority." (20 U.S.C. 1416(a)(3)(B))

The checklist asks the following questions:

- Are there appropriate measurable postsecondary goals in the areas of training, education, employment, and, where appropriate, independent living skills?
- Are the postsecondary goals updated annually?
- Is there evidence that the measurable postsecondary goals were based on age appropriate transition assessment(s)?
- Are there transition services in the IEP that will reasonably enable the student to meet his or her postsecondary goals?
- Do the transition services include courses of study that will reasonably enable the student to meet his or her postsecondary goals?
- Are there annual IEP goals related to the student's transition service needs?
- Is there evidence the student was invited to the IEP Team meeting where transition services were discussed?
- If appropriate, is there evidence a representative of any participating agency was invited to the IEP Committee meeting with the prior consent of the parent or student who has reached the age of majority?

\* In Mississippi, transition services must be addressed by age 14.

## Considerations for Students with Significant Cognitive Disabilities

Secondary transition for students with significant cognitive disabilities (SCD) can be challenging. It is best practice to begin identifying transition needs and addressing those needs early, especially for students classified as having an SCD.

The following are some guided questions when addressing transition for students with significant disabilities<sup>6</sup>.

1. Can the young adult express interests? If no, get information from parents and caregivers to develop transition plan.
2. What are special health care needs?
3. What equipment is necessary to meet the needs of the student?
4. What are needs/challenges preventing the young adult from working outside the home?
5. Who can provide education/training to assist the young adult?
6. What can the young adult accomplish without assistance?
7. In what areas does the young adult need assistance?
8. What else could the young adult accomplish if assistance were provided by a job coach, habilitation training specialist (HTS), or other caregiver?

Best practice indicates that a person-centered planning approach is one of the best ways to address secondary transition for students with disabilities, especially for those with significant cognitive disabilities. A person-centered plan is “an individualized approach that helps the person with developmental disabilities discover what he or she really wants. It is transformational, moving from an approach geared towards fixing or solving problems, to one focused on providing opportunities, avenues for self-actualization, personal freedom, meaningful interdependence, and community involvement<sup>7</sup>.” There are a variety of person-centered planning tools, including but not limited to Making Action Plans (MAPs), Planning Alternative Tomorrows with Hope (PATH), Essential Lifestyle Planning (ELP), and Personal Futures Planning (PFP).

## Person-Centered Planning

There are four (4) steps to Person-centered Planning modified from the article *Person-Centered Planning: A Tool for Transition*<sup>8</sup>:

1. Choosing a Facilitator
2. Preparing for the Planning Meeting
3. Holding the Meeting
4. Planning and Strategizing at Follow-Up Meetings

### Step 1: Choosing a Facilitator

The facilitator is the individual that is trained to facilitate the person-centered process. He/she needs to be a good listener who is willing to work creatively to help shape the dreams of the student by discovering the capabilities of the student. The facilitator needs to be able to identify community resources and have the ability to engage those resources on behalf of the student.

### Step 2: Preparing for the Planning Meeting

It is important to identify the key individuals in the student's life and invite those individuals to the planning meeting, and to identify a date, location, and time for the meeting. The facilitator and family should meet prior to the planning meeting to make those decisions. At the preparation meeting, the family will:

- Identify key individuals in the student's life they want to invite to the meeting.
- Identify a date, time, and location for the person-centered planning meeting and additional follow-up meetings.
- Discuss strategies that increase participation of all individuals involved.
- Decide who will take the lead in gathering information about the student.

<sup>8</sup> National Center on Secondary Education, and PACER Center. "Parent Brief." *Promoting Effective Parent Involvement in Secondary Education and Transition*. N.p., February 2004. Web. 15 Apr. 2013.

- Determine which person-centered planning process will be used (e.g. MAPs, PATH, ELP, PFP).
- Develop a history or personal life story or profile of the student. This includes, but is not limited to, critical events, medical issues, major developments, important issues, and important relationships.
- Describe the quality of the student’s life by exploring the following: community participation, community presence, choices/rights, respect, and competences.
- Describe the personal preferences of the student.

### **Step 3: Holding the Meeting**

During the meeting, the participants will:

- Review the personal profile and make additional comments and observations.
- Identify ongoing events that are likely to affect the focus person’s life (e.g. medical conditions).
- Share visions for the future. Brainstorm ways to increase outcomes for the student.
- Identify obstacles and opportunities that give the vision a real-life context.
- Create an action plan that identifies what needs to be done, what materials/equipment are needed, who will do it, when the actions will occur, and when the participants will meet again. It is best to identify steps that can be completed in a short period of time.

### **Step 4: Planning and Strategizing at Follow-Up Meetings**

After the meeting, the participants should begin implementing the action plan. This can require participants to be creative and problem-solve depending on the required actions. Periodically, the team needs to meet to discuss what parts of the plan are working and what parts are not working. By the conclusion of the follow-up meeting, the participants must identify next steps, which include what needs to be done, who will do it, when the actions will occur, and when the participants will meet again.

For each follow-up meeting, the team must:

- Identify participants for the follow-up meetings.
- Identify a date, time, and location for the follow-up meetings.
- List all activities that had occurred previously.
- List all challenges and barriers that occurred.
- Brainstorm new ideas and strategies for the future.
- Set priorities for the next agreed-upon time period (e.g. 6 months, 12 months).
- Establish renewed commitment of participants.
- List five (5) to ten (10) concrete steps for each participant to follow.
- Always celebrate the success!

## Customized Employment

The United States Department of Labor, Office of Disability and Employment Policy (ODEP) defines customized employment as follows:

Customized employment means individualizing the employment relationship between employees and employers in ways that meet the needs of both. It is based on an individualized determination of the strengths, needs, and interests of the person with a disability, and is also designed to meet the specific needs of the employer. It may include employment developed through job carving, self-employment, entrepreneurial initiatives, or other job development or restructuring strategies that result in job responsibilities being customized and individually negotiated to fit the needs of individuals with a disability. Customized employment assumes the provision of reasonable accommodations and supports necessary for the individual to perform the functions of a job that is individually negotiated and developed. (Federal Register, June 26 2002, Vol. 67, No. 123 pp. 43154–43149).

Customized employment is an individualized approach to vocational supports and services: one person at a time. It is a negotiation between a job seeker, his/her representative, and an employer. Many times, the negotiation begins with the potential of employment without there being an open position. Customized employment tailors a job based on skills, interests, strengths, and support needs of the job seeker to meet specialized needs of the employer.

According to Griffin-Hammis, LLC<sup>9</sup>, the principal hallmarks and activities of customized employment include:

- Identifying specific job duties or employer expectations that are negotiated with employers;
- Targeting individualized job goals to negotiate based on the needs, strengths, and interests of the employment seeker;
- Meeting the unique needs of the employment seeker and the discrete, emerging needs of the employer;
- Starting with the individual as the source of information for exploring potential employment options;
- Offering representation, as needed, for employment seekers to assist in negotiating with employers;
- Occurring in integrated, non-congregate environments in the community or in a business alongside people who do not have disabilities;
- Resulting in pay at least the prevailing wage (no sub-minimum wages);
- Creating employment through self-employment and business ownership;

---

<sup>9</sup> Griffin-Hammis. *Customized Employment FAQ*. Working paper. N.p., n.d. Web. 7 May 2013.

- Facilitating an amalgam of supports and funding sources that may include Workforce Investment (One-Stops/Career Centers), Vocational Rehabilitation (VR), Medicaid, Community Rehabilitation Programs (CRPs), schools, Social Security (SSA), families, and other partners coordinated in ways to meet the needs of the individual (Griffin & Hammis, 2005; Callahan, 2005; Condon, 2004).

ODEP<sup>10</sup> identified four essential components to customized employment. They are as follows:

1. **Discovery:** The process of gathering information from the job seeker to determine his/her interests, skills, and preferences as it relates to potential employment and the development of a customized job.
2. **Job Search Planning:** The process of analyzing the data to create a plan for meaningful employment, identifying a list of potential employers, and analyzing benefits.
3. **Job Development and Negotiation:** Working with the job seeker and potential employer to negotiate the customized job, the provision of supports, and the terms of employment that will match the job seekers interests, skills, and preferences.
4. **Post-Employment Support:** Setting up post-employment supports and monitoring the employment relationship to ensure satisfaction of both the employee and the employer.

Customized employment may take the form of<sup>11</sup>:

- **Task reassignment:** Some of the job tasks of current workers are reassigned to a new employee. It typically takes the form of job creation, whereby a new job description is negotiated based on current, unmet workplace needs.
- **Job carving:** An existing job description is modified — containing one or more, but not all, of the tasks from the original job description.
- **Job sharing:** Two or more people share the tasks and responsibilities of a job based on each other's strengths.
- **Self-Employment:** This allows for an individual to receive assistance in the creation of an independently owned small business (typically a microenterprise, under five employees). The business is based on the strengths and dreams of an individual and the unmet need of a local market while incorporating the individualized planning and support strategies needed for success.

## **Transition Specialist Through Vocational Rehabilitation**

The Mississippi Department of Rehabilitation Services (MDRS) may enter into an agreement with local school districts to provide professional services for a Transition Specialist. The Transition Specialist will carry out specified duties as outlined in the agreement with MDRS providing oversight for the administration of the program through its Vocational Rehabilitation (VR) counselor representative. The school district employs the Transition Specialist and will pay 100% of the expenses incurred by the program with State funds. A quarterly invoice will be sent to the appropriate MDRS representative requesting reimbursement. Federal funds will be made available by MDRS to cover half the agreed upon cost (salary, fringe, travel, and staff development) for the position.

The Transition Specialist works in cooperation with the VR counselor, school district personnel, community-based agencies, and community business members. The Transition Specialist will provide, in self-motivated manner, both at the school and job sites, active support to students with various disabilities. Transition Specialist services include individualized services that are directly related to assisting students in entering and maintaining competitive integrated employment in the community for VR eligible clients. The Transition Specialist will coordinate all activities with, and provide monthly reports to, the VR counselor and school personnel. The VR counselor, as needed during the course of this agreement, will provide program coordination and technical assistance. Each Transition Specialist is expected to work with a minimum of 20 students who are VR clients and will provide separate monthly reports to the VR counselor on each student.

The addition of school-based transition services is intended to add a component to the overall school and rehabilitation service continuum, not supplant any existing employment-related or other services, which are potentially appropriate for a particular student (any service the school is already responsible for providing). Students who can benefit from existing school programs such as career/technical and educational training programs, vocational education, etc., with or without modifications, are not the target population for the Transition Specialist. These students can be appropriately served in existing service options and therefore the primary issue is to ensure these services are available and provided to these students. Students who are eligible for and are clients of VR, and who require the more intensive services of the Transition Specialist are the intended target student population. Transition Specialist Services do not include or supplant any activities or services ordinarily provided by the schools including regular classroom teaching, substitute teaching, or any other functions not directly related to placing students into employment.

Transition Specialist duties depend on individual student needs and as appropriate to each student which may include, but are not limited to major categories of:

Consumer Assessment which involves 1) gathering and reviewing existing formal and informal assessment and evaluation information, 2) collecting data and maintaining confidential and accurate case files for students, 3) participating in transition meetings, as assigned, and 4) observing students during in-school work experiences, during classroom activities, at home, and in other current school and community environments.

Job Development which involves 1) conducting analysis of work sites and assignments, as well as situational assessments of individual students in real work settings to gather pertinent information (e.g., job choice/preferences, work strengths, response to instruction/training methods, job accommodation needs, job modification needs, response to coworkers, endurance, speed, reinforcement needs, etc.) as part of job development and placement for a student to ensure a good job match, 2) traditional job development activities and non-traditional job development activities such as job sharing and job carving/creation, and 3) maintaining a database and tracking system of active and inactive employers.

Job Placement which involves 1) task analysis of job duties, 2) matching student's strengths and abilities to specific jobs duties, 3) assisting in training plans, 3) developing job support plans, including natural supports, and 4) assessing transportation needs.

Assisting with Coordination of Job Related Supports which involves 1) orienting worker to the community (select travel options, design & implement travel program), 2) establishing rapport with supervisors, coworkers, and family, 3) orienting new employee to the work environment, 4) reassessing job/worker compatibility, 5) identifying strategies to increase worker production rate, and, 5) assisting the VR Counselor in developing and completing all needed work incentive information.

Please contact Donny Frazier with the Mississippi Department of Rehabilitation Services, P.O. Box 1698, Jackson, Mississippi 39215-1698 or call 601-853-5279 for additional information for the Transition Specialist position.

# APPENDICES

Appendix ST.A	Top 10 Highlights for Secondary Transition
Appendix ST.B	Nationally Endorsed Summary of Performance
Appendix ST.C	Indicator 13
Appendix ST.D	List of Coordinated Transition Services
Appendix ST.E	Transfer of Functional Skills Checklist

## **Top 10 Highlights for Secondary Transition**

1. A Transition Plan must be in place by no later than age fourteen (14).
2. Graduation/Exit Options should be discussed with the student and parent(s)/guardian(s) as soon as the student is identified as a child with a disability.
3. Transition Plans should be reviewed/updated at least once annually.
4. There must be at least one postsecondary transition goal for education/instruction, employment, and independent living skills (if needed). Each goal must have a direct correlation to at least one annual IEP goal.
5. Written Parental Permission must be given before any person/agency, who is not an agent of the LEA can be invited to the Transition IEP meeting.
6. Postsecondary goals must be based upon an age-appropriate transition assessment. The results of this assessment must be listed in the student's Present Levels of Academic Achievement and Functional Performance (PLAAFP) section of his/her IEP.
7. A Transition Plan must include the courses of study and the courses must match the selected Graduation/Exit Option determined by the student's IEP Committee to be appropriate for the individual student.
8. There must be documentation which demonstrates the student was invited to participate in the Transition IEP meeting.
9. There must be documentation which demonstrates an outside agency/linkage (if needed) was invited to the Transition IEP meeting.
10. For each postsecondary goal, at least one transition service must be included in the annual IEP.

# NATIONALLY ENDORSED SUMMARY OF PERFORMANCE

## Instructions

**Purpose:** The Summary of Performance (SOP) is required under the reauthorization of the Individuals with Disabilities Education Act of 2004. The language as stated in IDEA 2004 regarding the SOP is as follows:  
For a child whose eligibility under special education terminates due to graduation with a regular diploma, or due to exceeding the age of eligibility, the local education agency “shall provide the child with a summary of the child’s academic achievement and functional performance, which shall include recommendations on how to assist the child in meeting the child’s postsecondary goals” §Sec. 300.305(e)(3).

The Summary of Performance, with the accompanying documentation, is important to assist the student in the transition from high school to higher education, training and/or employment. This information is necessary under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act to help establish a student’s eligibility for reasonable accommodations and supports in *postsecondary* settings. It is also useful for the Vocational Rehabilitation Comprehensive Assessment process. The information about students' current level of functioning is intended to help postsecondary institutions consider accommodations for access. *These recommendations should not imply that any individual who qualified for special education in high school will automatically qualify for services in the postsecondary education or the employment setting. Postsecondary settings will continue to make eligibility decisions on a case-by-case basis.*

The SOP is most useful when linked with the IEP process and the student has the opportunity to actively participate in the development of this document.

The SOP **must** be completed during the final year of a student’s high school education. The timing of completion of the SOP may vary depending on the student’s postsecondary goals. If a student is transitioning to higher education, the SOP, with additional documentation, may be necessary as the student applies to a college or university. Likewise, this information may be necessary as a student applies for services from state agencies such as vocational rehabilitation. In some instances, it may be most appropriate to wait until the spring of a student’s final year to provide an agency or employer the most updated information on the performance of the student.

**Part 1: Background Information** – Complete this section as specified. Please note this section also requests that you attach copies of the **most recent** formal and informal assessment reports that document the student’s disability or functional limitations and provide information to assist in post-high school planning.

**Part 2: Student’s Postsecondary Goals** – These goals should indicate the post-school environment(s) the student intends to transition to upon completion of high school.

**Part 3: Summary of Performance:** This section includes three critical areas: Academic, Cognitive and Functional levels of performance. Next to each specified area, please complete the student’s present level of performance and the accommodations, modifications and assistive technology that were **essential** in high school to assist the student in achieving progress. Please leave blank any section that is not applicable.

An **Accommodation** is defined as a support or service that is provided to help a student fully access the general education curriculum or subject matter. Students with impaired spelling or handwriting skills, for example, may be accommodated by a note-taker or permission to take class notes on a laptop computer. An accommodation *does not change the content* of what is being taught or the expectation that the student meet a performance standard applied for all students. A **Modification** is defined as a change to the general education curriculum or other material being taught, which alters the standards or expectations for students with disabilities. Instruction can be modified so that the material is presented differently and/or the expectations of what the student will master are changed. Modifications are not allowed in most postsecondary education environments. **Assistive Technology** is defined as any device that helps a student with a disability function in a given environment, but does not limit the device to expensive or “high-tech” options. Assistive technology can also include simple devices such as laminated pictures for communication, removable highlighter tapes, velcro and other “low-tech” devices.

The completion of this section may require the input from a number of school personnel including the special education teacher, regular education teacher, school psychologist or related services personnel. It is recommended, however, that one individual from the IEP Team be responsible for gathering and organizing the information required on the SOP.

**Part 4: Recommendations to assist the student in meeting postsecondary goals** – This section should describe any essential accommodations, assistive technology, supportive services, or general areas of need that students will require to enhance access in a **post-high school** environment, including higher education, training, employment, independent living and/or community participation.

**Part 5: Student Input (Highly Recommended).** It is highly recommended that this section be completed and that the student provide information related to this Summary of Performance. The student’s contribution can help (a) secondary professionals complete the summary, (b) the student to better understand the impact of his/her disability on academic and functional performance in the postsecondary setting, (c) postsecondary personnel to more clearly understand the student’s strengths and the impact of the disability on this student. This section may be filled out independently by the student or completed with the student through an interview.

## Part 5 – Student Input (Highly Recommended)

### **SUMMARY OF PERFORMANCE: STUDENT PERSPECTIVE**

- A. How does your disability affect your schoolwork and school activities (such as grades, relationships, assignments, projects, communication, time on tests, mobility, extra-curricular activities)?
  
- B. In the past, what supports have been tried by teachers or by you to help you succeed in school (aids, adaptive equipment, physical accommodations, other services)?
  
- C. Which of these accommodations and supports has worked best for you?
  
- D. Which of these accommodations and supports have not worked?
  
- E. What strengths and needs should professionals know about you as you enter the postsecondary education or work environment?

I have reviewed and agree with the content of this Summary of Performance.

### Indicator 13 Checklist

Indicator 13: Percent of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition service needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority. (20 U.S.C. 1416(a)(3)(B))

	# IEPs Y	# IEPs N
1. Are there appropriate measurable postsecondary goals in the areas of training, education, employment, and, where appropriate, independent living skills?		
Can the goals be counted? Will the goals occur <i>after</i> the student graduates from school? Based on the information available about this student, do the postsecondary goals seem appropriate for this student? <ul style="list-style-type: none"> <li>• If <i>yes</i> to all three guiding questions, then count as Y OR if a postsecondary goal is <i>not</i> stated, count as N.</li> </ul>		
2. Are the postsecondary goals updated annually?		
Were the postsecondary goals addressed/ updated in conjunction with the development of the current IEP? <ul style="list-style-type: none"> <li>• If <i>yes</i>, then count as Y OR if the postsecondary goals were <i>not</i> updated with the current IEP, count as N.</li> </ul>		
3. Is there evidence that the measurable postsecondary goals were based on age appropriate transition assessment(s)?		
Is the use of transition assessment(s) for the postsecondary goals mentioned in the IEP or evident in the student's file? <ul style="list-style-type: none"> <li>• If <i>yes</i>, then count as Y OR if <i>no</i>, then count as N.</li> </ul>		
4. Are there transition services in the IEP that will reasonably enable the student to meet his or her postsecondary goals?		
Do the transition services listed in the student's IEP that the student needs to reach the postsecondary goals include, as needed, <i>instruction, related service(s), community experience, development of employment and other post-school adult living objectives, and if appropriate, acquisition of daily living skills and provision of a functional vocational evaluation</i> ? <ul style="list-style-type: none"> <li>• If <i>yes</i>, then count as Y OR if <i>no</i>, then count as N.</li> </ul>		
5. Do the transition services include courses of study that will reasonably enable the student to meet his or her postsecondary goals?		
Do the transition services include courses of study that align with the student's postsecondary goals? <ul style="list-style-type: none"> <li>• If <i>yes</i>, then count as Y OR if <i>no</i>, then count as N.</li> </ul>		
6. Is (are) there annual IEP goal(s) related to the student's transition services needs?		
Is (are) an annual goal(s) included in the IEP that is/are related to the student's transition services needs? <ul style="list-style-type: none"> <li>• If <i>yes</i>, then count as Y OR if <i>no</i>, then count as N.</li> </ul>		
7. Is there evidence that the student was invited to the IEP Team meeting where transition services were discussed?		
For the current year, is there documented evidence in the IEP or cumulative folder that the student was invited to attend the IEP Team meeting, (e.g. a letter inviting the student to the meeting)? <ul style="list-style-type: none"> <li>• If <i>yes</i>, then count as Y OR if <i>no</i>, then count as N.</li> </ul>		
8. If appropriate, is there evidence that a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority?		
For the current year, is there evidence in the IEP that representatives of any of the following agencies/services were invited to participate in the IEP development including but not limited to: <i>postsecondary education, vocational education, integrated employment (including supported employment), continuing and adult education, adult services, independent living or community participation</i> for the postsecondary goals? Was prior consent obtained from the parent (or student who has reached the age of majority)? <ul style="list-style-type: none"> <li>• If <i>yes</i> to both, then count as Y.</li> <li>• If <i>no</i> invitation is evident and a participating agency is likely to be responsible for providing or paying for transition services and there was consent to invite them to the IEP meeting, then count as N.</li> <li>• If it is too early to determine if the student will need outside agency involvement, or no agency is likely to provide or pay for transition services, count as Y.</li> <li>• If parent or individual student consent (when appropriate) was <i>not</i> provided, count as Y.</li> </ul>		

## Instructions for Completing the Indicator 13 Checklist

### 1. Are there appropriate measurable postsecondary goals in the areas of training, education, employment, and, where appropriate, independent living skills?

- Find the postsecondary goals for this student.
- If there are appropriate measurable postsecondary goals that address *Training* after high school, *Education* after high school, and *Employment* after high school, and (where appropriate) independent living *Skills* after high school **and** if the identified postsecondary goals for *Training*, *Education*, and *Employment*, and (where appropriate) *Independent Living Skills* appear to be appropriate for the student, based on the other information regarding Present Levels of Academic and Functional Performance and / or the student's strengths, preferences, and interests, count as Y.
- If a student's postsecondary goals in the areas of *Training* and *Education*, address both training for a career and other education after high school (e.g., enrollment in an adult education program focused on both job and independent living skills; enrollment in a college program in preparation for a career in architecture), count as Y.
- "It may not always be necessary for the student to have separate postsecondary goals for training and education in these instances. Based on the individual needs of the student and the student's plans after leaving high school, it may be reasonable for an IEP Team to interpret the areas of training and education as overlapping in developing postsecondary goals for a student. In these instances, an IEP Team could develop a combined postsecondary goal in the areas related to training and education. Employment is a distinct activity from the areas related to training and education, and each student's IEP must include a separate postsecondary goal in the area of employment. For further information see *Questions and Answers on Secondary Transition, Revised September 2011, OSEP, Retrieved <http://idea.ed.gov/explore/view/p/%2Croot%2Cdynamic%2CQaCorner%2C10%2C>*.
- If there are postsecondary goals that address *Training* after high school, *Education* after high school, and *Employment* after high school, and (where appropriate) *Independent Living Skills* after high school, but these goals are not measurable, count as N.
- If there is misalignment between the student's postsecondary goals, based on the information available (e.g., present levels of performance, student strengths, student interests, student preferences), count as N.
- If there is not a postsecondary goal that addresses *Training* after high school, count as N.
- If there is not a postsecondary goal that addresses *Education* after high school, count as N.
- If there is not a postsecondary goal that addresses *Employment* after high school, count as N.

### 2. Are the postsecondary goal(s) updated annually?

- If the postsecondary goals for *Training*, *Education*, *Employment*, and where appropriate *Independent Living Skills* are documented in the student's current IEP, count as Y.
- If the postsecondary goals for *Training*, *Education*, *Employment*, and where appropriate *Independent Living Skills* are not documented in the student's current IEP, count as N.
- If this is the student's first IEP that addresses secondary transition services because the student just turned 16, it is considered an update for purposes of this checklist, so count as Y.

### 3. Is there evidence that the measurable postsecondary goals were based on age appropriate transition assessment(s)?

- Find where information relates to assessment(s) and the transition component on the IEP (either in the IEP or the student's file).
- For each postsecondary goal, if there is evidence that at least one age appropriate transition assessment was used to provide information on the student's needs, strengths, preferences, and interests regarding the postsecondary goals count as Y
- For each postsecondary goal, if there is **no** evidence that age appropriate transition assessment(s) provided information on the student's needs, taking into account the student's strengths, preferences, and interests [regarding the postsecondary goals,] count as N.
- If a postsecondary goal area was addressed in item #1, but was not measurable and if there is age appropriate transition assessment information, from one or more sources, regarding the student's needs, taking into account the student's strengths, preferences, and interests [regarding this postsecondary goal], count as Y.

- If a postsecondary goal area was addressed in item #1, but was not measurable and if there is **not** age appropriate transition assessment information provided on the student's needs, taking into account the student's strengths, preferences, and interests [regarding this postsecondary goal], count as N.

**4. Are there transition services in the IEP that will reasonably enable the student to meet his or her postsecondary goals?**

- Find where transition services/activities are listed on the IEP.
- For each postsecondary goal, is there a transition service such as instruction, related service, community experience, development of employment and other post-school adult living objectives, and if appropriate, acquisition of daily living skill(s), and provision of a functional vocational evaluation) listed that will enable the student to meet the postsecondary goal, count as Y.
- For each postsecondary goal, if there is **no** transition service that relates to a specific postsecondary goal, (a) type of instruction, (b) related service, (c) community experience, (d) development of employment and other post-school adult living objective, (e) if appropriate, acquisition of a daily living skill, or (f) if appropriate, provision of a functional vocational evaluation listed in the IEP that will enable the student to meet the postsecondary goal, count as N.
- If a postsecondary goal area was addressed in item #1, but was not measurable and there is a transition service that will enable the student to meet that postsecondary goal, count as Y.
- If a postsecondary goal area was addressed in item #1, but was not measurable and there is **no** transition service listed that will enable the student to meet that postsecondary goal, count as N.

**5. Do the transition services include courses of study that will reasonably enable the student to meet his or her postsecondary goals?**

- Locate the course of study (instructional program of study) or list of courses of study in the student's IEP.
- Are the courses of study a multi-year description of coursework from the student's current to anticipated exit year that is designed to help achieve the student's desired post-school goals? If yes, go to next instruction bullet. If no, count as N.
- Do the courses of study align with the student's identified postsecondary goals? If yes, count as Y. If no, count as N.

**6. Is (are) there annual IEP goal(s) that is (are) related to the student's transition service needs?**

- Find the annual goals, or, for students working toward alternative achievement standards, or States in which short-term objectives are included in the IEP, short-term objectives on the IEP.
- For each of the postsecondary goal areas counted as Y in question #1, if there is an annual goal or short-term objective included in the IEP related to the student's transition service needs, count as Y.
- For each of the postsecondary goals mentioned in question #1, if there is **no** annual goal or short-term objective included in the IEP related to the student's transition service needs, count as N.
- If a postsecondary goal area was addressed in #1, but was not measurable, and an annual goal is included in the IEP related to the student's transition service needs, count as Y
- If a postsecondary goal area was addressed in #1, but was not measurable, and there is **no** annual goal included in the IEP related to the student's transition service needs, count as N.

**7. Is there evidence that the student was invited to the IEP Team meeting where transition services were discussed?**

- Locate the evidence that the student was invited, (e.g., a copy of the student's invitation to the IEP conference). Was the student invitation signed (by the LEA) and dated prior to the date of the IEP conference? If yes, count as Y. If no, count as N.

**8. If appropriate, is there evidence that a representative of any participating agency [that is likely to be responsible for providing or paying for transition services] was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority?**

- Find where persons responsible and/or agencies are listed on the IEP.
- Are there transition services listed on the IEP that are likely to be provided or paid for by an outside agency? If yes, continue with next instruction bullet. If no, count as NA.

- Was parent consent or student consent (once student has reached the age of majority) to invite an outside agency (ies) obtained? If yes, continue with next instruction bullet. If no, count as NA.
- If a postsecondary goal area was addressed in item #1, but was not measurable and there is evidence that agency(ies) for which parent/student had given their consent to invite, were invited to the IEP meeting to discuss transition, count as Y.
- If a postsecondary goal area was addressed in item #1, but was not measurable and there is no evidence that agency(ies) for which parent/student had given their consent to invite, were invited to the IEP meeting to discuss transition, count as N.
- If it is too early to determine if this student will need outside agency involvement, count as NA

61. Able to locate and complete information for grants, loans, scholarships
62. Able to schedule and follow through on college/tech school visits

### **Suggested Transition Activities for “Related Services”**

Activities/strategies in this area should consider the current and projected related service needs of the student. This area of the statement of needed transition services is not for specifying the needed related services for the next school year. Related services for the coming school year should be addressed in another section of the IEP. Rather, the context of related services in this statement has to do with determining if the related service needs will continue beyond school, helping to identify who or what agency might provide those services, helping to identify how the student and parent can access those services and then connecting the student and parent to whomever will provide those services before the student leaves the school system. This type of planning, discussion, and identifying of activities/strategies should make the move from the school being one related service provider to another adult agency or service provider as seamless as possible for students and families.

1. Rehabilitation counseling
2. Orientation and mobility services
3. Any linkages to adult agencies or providers
4. Develop a list of people, phone numbers, etc., who can be resources to you once you leave school. Keep this information in a safe place that you remember!!!
5. Apply at adult support agencies
6. Identify and visit community mental health agencies
7. Identify potential post school providers of related services and funding sources
8. Identify potential post school providers of recreation therapy or occupational therapy and potential funding sources
9. Visit potential post school providers of physical therapy
10. Apply for a mentor through a local, non-profit agency for counseling of substance abuse and delinquency
11. Engage in conversations using an augmentative communication device
12. Receive orientation and mobility training in place of employment
13. Interview a job coach for assistance with learning job tasks
14. Learn about potential post school providers of speech therapy
